It is the participant's responsibility to comply with the minimum system requirements to take the TOEFL ITP Digital test.

Minimum System Requirements

Before beginning setup, verify that your computer meets the requirements described below. If it does not meet the minimum system requirements, you will not be able to launch the test.

Have a strong, stable internet connection. This is extremely important. If possible, use a hard-wired connection to your router. You may experience difficulties with even the best Wi-Fi connection. The extra load of the remote proctoring software will slow things down and make it difficult for images to load and for the system to save your answers.
